WORK EXPERIENCE

Backend Developer
Freelance

06/2024 - Present

Achievements/Tasks

- as a Node.js developer, specializing in creating custom servers to integrate Shopify with CRM systems like Priority and Minisoft via APIs and webhooks.
- Each project involves building tailored server solutions to meet specific client requirements.

Software Developer
Kyndryl

2022 - 2024

Formerly IBM GTS: IT infrastructure service provider

Achievements/Tasks

- AutoSDE - automatic storage management: quickly integrated myself into a product several years into development, actively taking part in design meetings and driving new features from backend in **python** to frontend in **react** and **ruby**, contributing to an open-source project in collaboration with its owners at https://github.com/ManageIQ.
- Frontend and backend apps development for a Kyndryl Research demo: understanding product goals and requirements, building a modern interactive UI with **react** and customize an open-source **react native** iPhone app that fit for presenting to high-ranking Kyndryl officials and potential customers.
